28. Description of Change: (use additional Sheets if necessary) Move a 4 GB drive from t1aqq01's vault L to cherokee. This vault is currently not being used. This is to support patch upgrade testing. This will allow a clone of the root disk to be made. The upgrade patches will be applied to the cloned root disk allowing the root disk to be saved in case recovery is necessary. Once the server is stable with the upgrade on the cloned root disk, the old root will be moved into the vault. The serial numbers will need to be switched in VCATS. The same procedure will be done with the 2GB drive.						
29. Proposed Solution: (use additional sheets if necessary) This change will allow the verification of the patch installation instructions on the VATC prior to the delivery to the DAAC's.						
30. Alternate Solution: (use additional sheets if necessary) none						
31. Consequences if Change(s) are not approved: (use additional sheets if necessary) Problems wont be found until the patches are delivered to the DAAC's
